

UCSF LIVER CENTER MINI-SYMPOSIUM

Metabolic Pathways in Hepatocarcinogenesis

Friday, September 22, 2017

9am-3:30pm | Mission Bay, Mission Hall 1400

Organizer: Xin Chen, PhD

RSVP required to reserve lunch | sandhya.adiyodiveetil@ucsf.edu

- 9:00 AM **Xin Chen, PhD | UCSF**
Welcome & introduction
- 9:10 AM **Daniel Nomura, PhD | UC Berkeley**
Using chemoproteomic platforms to map druggable hotspots in human disease
- 10:00 AM **Dean Felsher, MD, PhD | Stanford University**
Defining novel metabolic vulnerabilities in hepatocellular carcinoma

Coffee Break 10:50 AM - 11:05 AM

- 11:10 AM **Gen-Sheng Feng, PhD | UCSD**
Dissecting the anti-oncogenic effects of classical oncoproteins in hepatocarcinogenesis

Lunch Break 12:00 PM - 12:55 PM

- 1:00 PM **Guisheng Song, PhD | University of Minnesota**
MicroRNA-206 links hepatosteatosis to hepatocellular carcinoma
- 1:50 PM **Pavithra Viswanath, PhD | UCSF**
Off the beaten track: the unusual nature of metabolic reprogramming in mutant IDH1 glioma cells
- 2:40 PM **Andrei Goga, MD, PhD | UCSF**
Oncogene regulation of metabolism in liver cancer
