

LIVER CENTER SEMINAR

**Wednesday, May 10, 2017
9:00-10:00 AM
S-214, Parnassus Campus**

Yasuko Iwakiri, PhD
Associate Professor of Medicine
Yale University

New Insights on Hepatic Arterial Flow and Liver Fibrosis

Dr. Iwakiri's research focuses on liver fibrosis, portal hypertension and understanding the role of vascular biology in liver disease pathogenesis. In the area of liver fibrosis, her lab works on investigating the role of major liver cell type in fibrogenesis with a particular interest in hepatic stellate cells (HSC). Recently, her lab has extended its research focus on studying liver steatosis in both alcoholic and non-alcoholic settings.
