

UCSF Liver Center Mini-Symposium Series

Hepatic Lipid Metabolism in Health and Disease

Please join the Liver Center for the launch of its Mini-Symposium series covering topics with broad implications for liver research. The inaugural Mini-Symposium will focus on lipid metabolism, which is not only an essential liver function, but also plays a role in liver injury and cancer. Each expert presentation will be followed by time for questions and discussion.

- * **Andreas Stahl, PhD - UC Berkeley - Nutritional Sciences and Toxicology**
"Hepatic Fatty Acid Transporters"
- * **Ethan Weiss, MD - UCSF - Medicine/Cardiology**
"Growth Hormone Signaling and Fatty Liver Disease"
- * **Charles Harris, MD, PhD - UCSF - Medicine/Endocrinology**
"Triglyceride in Hepatic Steatosis: A Tale of Two DGATs"
- * **Jen-Chywan (Wally) Wang, PhD - UC Berkeley - Nutritional Sciences and Toxicology**
"Angiopoietin-like 4 (Angptl4) and Glucocorticoid-Regulated Lipid"
- * **Ronald Krauss, MD - CHORI - Clinical Pharmacology & Experimental Therapeutics**
"Integrative Genomics for Identifying Determinants of Lipid Response to Statins"

Tuesday, February 28, 2012

9:00am-2:00pm

Dolby Regeneration Medicine Building Board Room

Morning Coffee/Catered Lunch

Open to UCSF Community

Please RSVP
