

## UCSF Liver Center Mini-Symposium Series

### *Of Mice and Men: The Pathology of Liver Disease*

Please join the Liver Center for the next installment of the Mini-Symposium series covering topics with broad implications for liver research. This Mini-Symposium will focus on the pathology of liver disease. Each expert presentation will be followed by time for questions and discussion.

- \* **Linda Ferrell, MD | UCSF | Distinguished Professor in Anatomic Pathology**  
*Pathology Update: Nonalcoholic fatty liver disease | 2:20pm*
- \* **Stewart Sell, MD | Wadsworth Center | Senior Research Scientist**  
*Comparison of the cell lineage response of rats and mice to liver injury and hepatocarcinogenesis | 1:15pm*
- \* **James P. Grenert, MD, PhD | UCSF | Director of Surgical Pathology, SFGH**  
*Benign or Malignant? Atypical hepatocellular neoplasms | 11:00am*
- \* **Aras Mattis, MD, PhD | UCSF | Clinical Fellow, California Institute for Regenerative Medicine**  
*Human liver morphology in health and disease | 10:00am*
- \* **Caroline J. Miller, MSc | Gladstone Institutes | Director, Histology and Light Microscopy Core**  
*What the Gladstone Histology Core can do for your research | 9:15am*
- \*\*\* **Optional opportunity to have your histology slides reviewed by Drs. Sell and Grenert**  
*Moffitt Hospital | 3:30pm - 5:00pm | Room M-557*

Thursday, January 24, 2013

8:45am-3:30pm
