9am:
Jody Baron, MD, PhD, UCSF
Welcome and Introduction

9:10am:
Lia Avanesyan, PhD, Kalmanovitz Liver Immunology Laboratory, CPMC
Strong Innate and Adaptive Cellular Immune Responses Determine the Outcome of Acute HCV Infection in Humans

9:40am:
Nathan Meyers, PhD, Gladstone Institutes, UCSF
Using Liver Organoids to Identify Markers of Chronic and Acute Hepatitis C Infection

10:10am Coffee Break

10:30am:
Jean Publicover, PhD, UCSF
An OX40/OX40L Interaction Directs Successful Immunity to Hepatitis B Virus

11:00am:
Keynote Speaker
David Adams, MD, Institute of Immunology and Immunotherapy, University of Birmingham
VAP-1 A Link Between the Gut and Liver in Inflammatory Liver Disease

12:00pm Lunch catered by Bicycle Banh Mi

1:15pm:
Matt Spitzer, PhD, UCSF
The Impact of Liver Metastases on Systemic Immune Regulation

1:45pm:
Jay Ryan, MD, UCSF
NK Receptor Polymorphisms Predict HCV Cirrhosis and Direct Antiviral-Associated Post Treatment HCC

2:15pm:
Stewart Cooper, MD, Kalmanovitz Liver Immunology Laboratory, CPMC
Analysis of T Cell Repertoire Diversity in the Setting of Liver Disease

RSVP required to reserve lunch
